The Master's Creations Part 1

A mysterious character in a black suit with shiny black hair sits in a pointy edged sophisticated space-aged chair and he looks down at computer screens giving readouts on various planets in the Ultraverse. Earth appears on one of the screens and it does a quick scan and Jason and Mason come up in the scan. The mysterious character said, "Stop right there." The wimpy worker controlling the scan stops and an image of Jason and Mason is on the screen. The mysterious figure said, "I've found them. Crush! Come in here." A large humanoid figure wearing a rugged spiky biker's jacket and has a hat covered with pointy spikes and is covered with a black suit with green veins enters the scene. Crush bows down to the mysterious figure and he said, "What is thy bidding my master?" Mysterious figure said, "I want you to take my ship down to earth and bring me Jason and Mason by any means necessary. Even if it means breaking your character."

Crush takes control of a ship that has a large round base and a curved spike at the top and he lands it on earth in front of Jason and Mason's house in broad daylight. Crush rings the doorbell to Jason and Mason's house and Jason and Mason answer. Jason said, "What is this?" Crush said, "Jason and Mason. You are the winners of an interuniversal cruise through the Ultraverse and you get to stay at the most prestigious resort the Ultraverse has to offer." Jason said, "Really. This sounds..." Mason said, "We never entered any contest like this. I think you have the wrong place." Crush said, "This contest does not require any kind of entry. Being a citizen in one of the many universes of the Ultraverse is enough to make you a worthy candidate." Mason said, "We've fallen for scams like this before and I don't think we want to fall for another one again." Jason said, "What if this is not a scam and it is actually something good." Mason said, "I doubt that." Crush points to Jason and said, "He has a point." Mason said, "There is something suspicious about this. We are not going to fall in this. Come with me, Jason. We have better things to do than listening to this creep." Crush said, "You leave me with no choice." Crush takes out a blaster and it blasts out an electric net. Jason and Mason dodge the electric net and they run for the lab. Jason and Mason run into Mason's lab and they seal the door shut airtight. Mason arms all the security systems in the lab.

Crush grabs onto the entrance to Mason's lab and he rips it out of the lab and he throws it away. Crush walks into Mason's lab and security turrets are activated and they open fire on him. Crush jumps and he uses his overly sharp nails in his digits to cut down all the turrets. Jason and Mason grab onto some of Mason's blasters and they open fire on Crush. Crush dodges all the blasts and he zips to Jason and Mason and he encloses them in his tight grips.

Crush walks with Jason and Mason in his grips and he enters his ship. Captain Fusion is in a tree and he uses binoculars and he watches Crush escaping with Jason and Mason. Captain Fusion said, "He's not getting away with them." Captain Fusion jumps out of the tree and he dashes to the ship and the door begins to close. Captain Fusion slides into the ship narrowly avoiding the door closing on him.

Crush spots Captain Fusion in the main control section of the ship. Crush said, "Look what else I got. Looks like I got a bonus." Captain Fusion points and he said, "What is your deal? Who are you working with that wants Jason and Mason?" Crush said, "I will never reveal that to you." Crush places Jason and Mason in a gold sphere with visible openings revealing Jason and Mason are inside the sphere. Crush places the sphere into a tube and it is shot out of the ship and it is rocketed into the sky. Captain Fusion said, "Where did you send them?" Crush said, "I will never tell you that." Captain Fusion said, "I guess we are doing this the hard way then." Captain Fusion jumps at Crush. Crush swings his large sharp fists at Captain Fusion. Captain Fusion smacks Crush in the head and his fist goes big and swells. Crush smacks Captain Fusion in the upper chest and he flies backwards. Captain Fusion lands in front of a box that has electricity wires flowing through them with energy being visible in the wires. Crush jump and he grabs onto Captain Fusion and raises him high over his head. Captain Fusion takes out a harpoon gun and he fires it at Crush and it attaches to his suit. Captain Fusion yanks it and it rips some of the veins flowing through him. Crush drops Captain Fusion as he grabs his leaking body. Captain Fusion stands in front of the energy box in the wall. Crush swings at Captain Fusion and he ducks and Crush's sharp digits get stuck in the energy box. Energy flows through Crush and his body begins to spark. Captain Fusion spots a control console for the energy box. Captain Fusion said, "Where are Jason and Mason headed to?" Crush said, "I will not answer." Captain Fusion increases the energy and Crush spirals out of control even more. Captain Fusion said, "Now where are they going?" Crush's body goes black and charred and he falls to the floor with energy still flowing through him. Captain Fusion said, "He appears to be dead. There must be some way I can find where Jason and Mason are headed."

Captain Fusion looks through the ship's computers and he finds a map of the Ultraverse on one of them. He sees an animated diagram showing a gold sphere being

launched from the ship and it is heading to some place in the Ultraverse and exact coordinates of where it is headed are displayed on the screen. Captain Fusion said, "It looks like I must bring this ship on an adventure to the far outer edge of the Ultraverse. The Ultraverse is a hazardous place and the outer edge is mostly undiscovered by most average Ultraverse adventurers. I am going to need some back up. I obviously can't get Jason and Mason to come with me so I must get the next best thing."

Captain Fusion controls the ship and he has it land on one of the roads of the crazy town from *Odyssey of Oddities*. Captain Fusion exits the ship and he said, "I must find Annie. Where could she be?" Captain Fusion looks around crazy town and he spots Isaac and Wayon walking out of an unmarked building with a large amount of cash on them. Isaac said, "This is awesome. We just made a lot of money to dupe Annie into getting her brain examined. We know what they are really going to do. They are going to alter her brain to make her into a whacko that actually belongs in crazy town." Wayon said, "This plan was really dope and now she will have to mope." Captain Fusion appears next to Isaac and Wayon and he said, "You duped Annie into a brain alteration?" Isaac said, "Why isn't it the great and powerful, Captain Fusion. What villain are you taking on this time? It is that guy with the brain or some other fruity villain that thinks he is better than you because he is?" Captain Fusion grabs onto Isaac and he pins Isaac to a wall. Captain Fusion said, "What is going on with Annie and where is she?" Isaac said, "Valuable information is called 'Valuable information' because there is a valuable price behind it." Captain Fusion reaches into his Fusion belt and he pulls out a small roll of bills and he said, "Will this cover it?" Isaac looks through the bills and he said, "Yep."

Captain Fusion breaks down a door in the mostly dark building and he finds Annie connected to a large glass bulb machine with electric bolts flying through it. Captain Fusion runs up a small flight of stairs that leads to a control console. Captain Fusion reads the data from a screen indicating how Annie's brain is being altered. Captain Fusion finds an undo button and he is about to press it and a short mad scientist grabs onto his head. The short mad scientist said, "Brain alteration is the one thing I based my life on. You are not going to ruin my masterpiece." Captain Fusion attempts to press the "undo" button while fighting with the short scientist. The short scientist kicks Captain Fusion and he almost falls off the edge but is saved by a guard railing. The mad scientist runs towards Captain Fusion and he grabs onto the mad scientist and he throws him into the glass bulb. Captain Fusion hits the "undo" button on the console and the entire process is abandoned just a second before the mad scientist's body collides with the bulb which smashes it and results in a catastrophic explosion. Annie's eyes open as she is strapped to a metal table. Annie said, "What happened?" Captain Fusion unstraps Annie and he said, "You were duped by Isaac and Wayon into getting a brain alteration that would have made you one of the mayor's mindless drones. Come with me. You are safe now. I need your help."

Captain Fusion and Annie run down the streets of crazy town and Annie said, "Jason and Mason were captured by someone from the Ultraverse?" Captain Fusion said, "That's what it seems. I wish I could tell you more but that is all I know right now." Captain Fusion and Annie run for the ship but they collide with the mayor as he stands in front of the door blocking it. The mayor said, "Well, little miss Annie. Where do you think you are going? Aren't you supposed to be getting a brain alteration right now?" Annie said, "I am not your slave. You will never own me." Captain Fusion said, "Jason and Mason are in grave danger and I need Annie to help me rescue them. The fate of the Ultraverse could be in grave danger." The mayor said, "This town will be in grave danger if I let Annie continue to be how she is and have her escape." Captain Fusion pushes the mayor to the side and Captain Fusion and Annie board the ship. The mayor gives a devilish grin as he watches the ship take off.

Captain Fusion and Annie take control of the ship and they are about to have it fly away from crazy town while the mayor is in his office and he presses a button that activates a tractor beam from city hall. The tractor beam pulls the ship towards crazy town. Captain Fusion and Annie look at the controls and Captain Fusion said, "It appears as if that mayor of yours doesn't want us to leave." Annie said, "I figured he would do something like this." Captain Fusion said, "I am trying to pull the ship away as much as possible but his tractor beam is too strong." Annie said, "If there is one thing I know about that mayor, it is that he is nothing but an idiot. I know how to break out of this." Annie takes control and she sends the ship flying towards city hall. The mayor watches the ship head for him and he said, "Yes. It is about time you finally give up." The ship flies fast into city hall and it smashes city hall leaving it and the tractor beam as nothing but a pile of rubble and the mayor is sitting in the rubble with bits of it in his mouth.

Captain Fusion and Annie fly into the sky and Captain Fusion and Annie enter coordinates and they activate some of the machines that generate a portal to the Ultraverse in the sky. They fly into the portal and they end up in Ultraverse space where the void is filled with dark shades of different colors. Captain Fusion said, "It looks like we have a course set for where Jason and Mason were brought to. Now we must look outside and try to spot different anomalies or oddities in Ultraverse space. We are travelling through an unexplored area so we must take note of everything we see." Annie looks into a telescope and she spots out different odd stars and odd things in Ultraverse space. Annie said, "Ultraverse space is filled with all kinds of bizarre objects. I wish I could have written a paper about these kinds of things." Annie's telescope vision is blocked by a large dark red and round intimidating ship that is heading towards them. Annie said, "There's a ship heading for us." The intimidating ship hovers over their ship and it drops a platform panel underneath it and Captain Fusion and Annie's

ship ends up between this ship and panel. Jagged energy binder beams are generated around the platform panel making it impossible for the ship to escape.

The viewscreen in Captain Fusion and Annie's ship is activated and the anthropomorphic urn with four arms, Multisword appears on the screen. Multisword said, "Foolish intruders. You have entered Red Star Monk space. What is your reasoning for this?" Captain Fusion said, "We have no business with you. We are on a course to an obscure planet in an uncharted region of Ultraverse space." Multisword said, "Really? An uncharted region of Ultraverse space? I want to know more." Annie said, "We can't trust this guy. He is a villain. I know way too well that these people are not to be trusted." Multisword said, "Come to my ship. We will arrange an agreement."

Captain Fusion and Annie are brought to the main bridge of Multisword's ship by swarms of Red Star Monks. Multisword said, "I know there is a really good reason for why you are flying through my space. You must be transporting something important." Captain Fusion said, "We have nothing. It is only passengers of only me and Annie and that is it." Multisword said, "I find that hard to believe. I will know if you are lying or not. Search the ship." Red Star Monks go to the ship to have it searched. Multisword said, "In the meantime, I can view your ship's data." Multisword activates a long rod on his ship that connects into the computer system of Captain Fusion and Annie's ship. Information and data appears on Multisword's screen. Multisword views the coordinates of where Captain Fusion and Annie are headed to. Multisword said, "It looks like you are heading for a planet that is not in my book of every planet in the Ultraverse. I must know about this planet. What is it like?" Annie said, "We know nothing about it. We have never been there before." Multisword said, "Then we will discover this new planet. Plot a course for the coordinates." One of the Red Star Monks plots a course and Multisword's ship heads for the coordinates.

Multisword said, "I know you are hiding something from me. There is something significant about this planet and you are not telling me its greatest secret. You are to be locked in my brig until you break the silence." Red Star Monks come and they grab onto Captain Fusion and Annie's arms. Captain Fusion throws two of them behind him to his front and he slams them on the floor. Captain Fusion smacks one of them in the head and he back smacks one of them and the Red Star Monk falls to the floor. More Red Star Monks crowd around Captain Fusion and Annie. Captain Fusion said, "How good of a fighter are you?" Annie said, "I only know what Admiral Lightning taught me. I think he taught you too so we should have the same skills." Captain Fusion said, "That Admiral Lightning was a cunning hero but he is rusty from his lack of recent hero work." More Red Star Monks jump to where Captain Fusion and Annie were standing but Annie grabs onto Captain Fusion's arm and Captain Fusion jumps and he grabs onto a vent on the ceiling. Multisword takes out all four of his swords. Multisword said, "There is no

escaping Multisword." Multisword jumps and sticks himself to the ceiling using the top suction cup on his urn body in front of the vent. He swings all four of his swords at Captain Fusion and Annie and they drop down and Multisword cuts the vent and Ivan rolls out of it and falls on the floor. The three heroes plummet to the floor and they look at each other. Captain Fusion and Annie said, "Ivan?" Ivan gets up and he arms his sword. Multisword said, "Ah, Ivan. Now I have the three greatest heroes in the Ultraverse in my ship. Imagine what I can do."

Ivan said, "I have been studying Multisword's ship. His vents go everywhere. I know where to go. Follow me." Ivan runs while Captain Fusion and Annie run behind him while they dodge Red Star Monks. Ivan cuts through a door and it leads to a round room with energy generators around the perimeter. Ivan said, "These energy generators are generating the binders that are keeping your ship in this ship's lock. We can defuse them." Captain Fusion, Annie, and Ivan go to one of the generators and Multisword and Red Star Monks pile in the round room. Multisword said, "I know what you are going to do but it won't work." Multisword and Ivan duel while Captain Fusion fights off the Red Star Monks. Captain Fusion runs up to Multisword and he smacks one of Multisword's arms and the arm with a sword in it flinches and it slashes Captain Fusion. Captain Fusion gets up and he punches Multisword and Multisword lifts Captain Fusion and throws him into Ivan.

Annie is standing on the sidelines watching the insane battle and she spots a main control conduit terminal at the opposite side of the entrance. Annie sees it reads, "Stabilization Controls." Annie runs to the control terminal and she opens it up and she views the circuitry. Annie is about to touch something on the inside and Multisword stops her with his swords blocking the circuitry. Multisword said, "This stabilizer is way more advanced than anything that could be understood by you." Multisword looks out a window and he sees the planet from the coordinates outside. Multisword said, "We are almost there. The truth will be revealed." Ivan jumps and he kicks Multisword and he clashes his sword with three of Multisword's swords and Multisword uses his fourth sword to block the circuitry. Ivan and Multisword duel as the ship gets closer to the planet to a point where the planet takes up the entire window. Captain Fusion jumps into the battle and he grabs onto Multisword's fourth arm where it connects to his urn body and he struggles and he breaks the arm off Multisword. Multisword's insides are exposed and some ashes start leaking out. Multisword said, "Damn you! You will all pay!" More Red Star Monks keep running into the fray and Captain Fusion and Ivan fight them off while Annie looks over the circuits of the stabilizer. The ship is close to the planet and Multisword said, "We are here."

Annie looks through the circuits and she pulls some of them out. A computer voice in the ship said, "Stabilizer disabled." The lock on the ship is undone and

Multisword's ship loses control. Annie said, "I think I did it. Now we can get back to our ship." The heroes try to run out the door and the three-armed Multisword stops them. He said, "You are not off the hook yet. You have disabled my stabilizer. It is impossible for us to properly land now. This ship is going to crash and all of us are going to be dead." Annie said, "Yeah, that means you are going to be dead too." Multisword said, "I already am dead." Ivan said, "He's right." Ivan draws his sword and he clashes it with all three of Multisword's swords. Captain Fusion tries to punch Multisword from the side but Multisword blocks Captain Fusion's fists with his sword. Captain Fusion grabs onto the blade of Multisword's sword. Annie spots Multisword's severed fourth arm on the sideline. Annie takes the sword out of it and she duels Multisword's third sword with it. All three of Multisword's arms are being used. The three heroes look at each other and they all kick Multisword at the same time. Multisword goes flying into a wall and he is smashed into more pieces and a pile of ashes is formed in his debris. The three heroes run out of Multisword's ship and they run back to their ship and they fly it over the planet.

Annie and Ivan look out the windows of the ship while Captain Fusion controls it. Annie said, "What kind of place is this?" Ivan said, "It looks like a madman's house." The planet is covered with rocks and dust and is filled with bizarre objects that look like rejected toys and things that could be rejected household appliances and electronics. Captain Fusion lands the ship and they get out and they see they are on a planet that looks like a scrapyard of all kinds of freaky knick-knacks. Captain Fusion said, "Now we must find Jason and Mason in all this."
